

Covid -19 Protocol

Revised 5/5/2020

- All patients will be pre-screened (verbal and written)
 - Have not been sick or around anyone who has been sick
 - Does not have nor recently interacted with anyone having a fever
 - Temperatures will be taken on all patients before being taken to the operatory
 - 100.4 and below can be seen
 - Pulse ox reading will be recorded as well
 - 94 and greater can be seen

- Operatory will now be disinfected with BioSurf
 - Currently the only disinfectant certified to kill Covid-19 and safe on all dental supplies

- Pre rinse
 - Patients will be required to complete a peroxide pre-rinse
 - 2- 30 second rinses or one 60 second rinse

- Aerosol reduction implementations
 - Hygiene operatory will have HVE suction to reduce aerosols- RELEAF
 - Restorative operatories will have assistant to use HVE as needed
 - Air purifiers with merv 18 HEPA filters placed throughout the office to clean the air of impurities

- PPE
 - N95 mask will be required for all aerosol appointments, Level 3 for all others
 - Gowns- will be changed for aerosol creating appointments
 - Hair coverings- surgical caps or disposable head coverings
 - Staff will bring scrubs, shoes, and surgical caps into work and change before seeing patients and then before returning home

- THESE ARE THE INTERM PROTOCOLS AND WILL BE REVISED AS NEEDED!
